# BI Publisher

JD Edwards

# BI Publisher

## What if...?

- Your company is having issues with reporting?
- There are problems with generating reports and documents?
- It takes a lot of effort to create and maintain reports on documents?
- Creation and maintenance of reports and documents with traditional reporting tools is troublesome, difficult to use, and time-consuming?

## The Solution

BI Publisher: the Oracle reporting solution that helps to develop, manage and deliver customized reports and documents.

- Development and maintenance of reports is easier, more intuitive and faster with BI Publisher in comparison to any traditional reporting tool.
- Thanks to these benefits, it helps decrease costs.
- It requires no extra licences and it is pre-integrated with Oracle.
- BI Publisher updates every time you upgrade your EnterpriseOne.
- You can make full use of the BI Publisher through the Web.

## Benefits:

Templates can be created with common desktop applications

Connectivity with different data source formats

Multiple layouts can be assigned for the same data source

## Why BI Publisher?

The BI Publisher is the Oracle reporting solution that helps to develop, manage and deliver highly customized reports and documents. Development and maintenance of reports is easier, more intuitive and faster with BI Publisher than with traditional reporting tools, helping us to decrease costs.
